Fresher with hands-on knowledge of Linux, Docker, SQL, and currently learning Ansible automation. Looking for an opportunity to start my tech career, apply technical skills practically, and gain real-world experience.

Skills

Core Skills : Linux, MySQL, Networking Fundamentals, Containerization, System Monitoring & Troubleshooting, Communication.

Tools: MySQL, Docker, Ansible Basics, Virtual Box, Git/GitHub, Claude AI.

Projects

Self-learning project — exploring Ansible fundamentals through hands-on playbook practice

May 2026

- Explored existing Ansible playbooks to understand YAML structure and task logic
- Practiced modifying and executing basic playbooks for software installation and service configuration on Red Hat Linux
- Gained beginner-level experience with inventory management and host configuration for multiple systems
- Worked with foundational Ansible modules such as yum, copy, service, command, and file

Deployed 3-tier Application using Docker – Personal Project

Aug 2025

- Learned Docker fundamentals including images, containers, networking through hands-on practice
- Deployed a 3-tier application on AWS EC2 using Docker and Docker Compose
- Worked with Dockerfiles for application deployment
- Managed container processes, monitored real-time logs, and troubleshooted deployment issues
- Resolved container communication problems by fixing Docker network configuration between services
- Monitored frontend access logs in real time using Nginx container to understand application traffic and behavior
- Reduced deployment time by automating builds with docker compose

Linux System Administration – Personal Lab Setup

May 2024

- Built a personal lab environment using VirtualBox with Red Hat and Ubuntu systems for practical Linux learning
- Practiced file and directory management, file navigation, permissions, user/group administration, and package installation
- Worked with process management, system monitoring, log analysis, and service management using systemctl
- Automated basic scripts using Cron jobs
- Gained hands-on experience with SSH, SCP, archiving, filtering, and log analysis

Education

College of Computer Science and Information Technology
Bachelor of Computer Science

Jul 2022 – May 2026
Maharashtra, India
