Motivated fresher seeking an opportunity in DevOps to collaborate on industry projects, leveraging skills in Linux administration, automation, containerization, cloud technologies, and infrastructure management to drive operational efficiency and system reliability.

Skills

Technical: Linux, Networking, Scripting, Containerization, Automation.

Tools: Python, MySQL, Docker, Ansible, Jira, AWS Cloud, Git/GitHub.

Projects

Deployed 3-tier Application using Docker – Personal Project

Jul 2025 – Aug 2025

- Managed Docker Images, Containers, Networks and Volumes in cloud environment (AWS EC2)
- Worked with Docker Files and Multistaged Docker Files
- Reduced deployment time by automating builds with docker compose
- Analyzed containers logs in Realtime and troubleshooter them
- Served frontend on nginx web-server using reverse proxy with individual container named Frontend

Linux & Cloud Infrastructure Support – Academic Project

Feb 2025 – May 2025

- Managed Linux servers deployed in a cloud environment (AWS EC2)
- Worked with Red Hat Linux systems for configuring services and permissions
- Provided support for IAM, EBS volumes, and security groups on AWS
- Managed MySQL installation and configuration in Linux environment
- Collaborated with a team to monitor, troubleshoot, log analysis, and maintain cloud-hosted Linux instances

Ansible-Based Automation – Pre-Built Playbook Implementation

Sep 2024 – Oct 2024

- Explored existing Ansible playbooks to understand YAML structure and task logic
- Modified and executed playbooks to automate software installations and service configuration on Red Hat Linux
- Configured Ansible inventory and hosts for multi-node deployments
- Used modules like yum, copy, service, user, and file to implement idempotent changes

Linux System Administration – Personal Lab Setup

May 2024 – Jul 2024

- Set up a personal lab using VirtualBox with Red Hat and Ubuntu systems
- Managed users, groups, permissions, cron jobs, and system logs
- Automated routine tasks using Bash scripts
- Understood service management using systemctl, firewallld, and SELinux basics

Education

College of Computer Science and Information Technology

Bachelor of Computer Science

Jul 2022 – Present

Maharashtra, India
